The premier is careful not to close the door to possible resump-tion of the negotiations. On the contrary, he gives Mr. de Valera and his superiers the amplest time and opportunity to reconsider their po-sition.

The fact that Premier Lloyd George is suffering from a chill was confirmed at his official residences in Downing street tonight. It was also announced that it would be necessary for the premier to remain indoors for a few days.

The refusal was based upon the premier's contention that the conference with the sinn feiners is but a preliminary meeting and that later a general parley will be held when all Irish factions will be represented.

PARLEY ON PEACE to Make Hubbies "Hit the Heavy"

By the Associated Fress.

BERLIN, Sept. 15.—The National Association of German Housewives has asked the Prussian parliament to recognize it formally as a labor union, but the application was decided when it application was denied when it was realized that the organiza-tion's constitution had failed to specify whether the housewives

were employers or employes.

The rejection of the request disclosed differences of opinion among members of the various branches. Some asserted that women who did their own housework were employes, while housework were employes, while housewives having maids or other hired

work were employes, while house-wives having maids or other hired help were employers.

Objections, particularly by peasa, members, to classifying married women whose household duties were performed by serv-ants as "professional wives" brought about an attempt to evade the issue by the use of the words "professional callings" in-stead of laborers, in the con-stitution.

There is a probability that hus-bands will be asked to put their wives on a salary and recognize woman's equality by sharing in the work of cooking, washing and caring for the children.

The sudience was shocked to learn that Miss Robertson developed a desire to smoke as early as her introduction in Washington. This is how it happened: "My first appearance in congress was not in congress, but at a caucus, which is a meeting of all the people of one party, who are trying to avoid quarreling with each other. When I came in the men were already smoking, because a caucus is the only place where men can smoke.

'The caucus was over the tariff bill and things were rather tense. I could see the men rather avoided me because they didn't wish to smoke in my face, so I kept getting farther and farther back in the hall. That was the only time I wanted to smoke, because I thought if I did the men would feel more comfortable. When the roll call came to my name they applauded until I had to stand and bow and how."
